CIRCULAR CAM 02/2008 add 1

N/Réf. : AH/63834

Subject : **Long-Range Identification and Tracking of Ships (LRIT)**

To : All ship owners, ship operators and designated persons of Luxembourg flagged ships

This circular completes the information provided in circular CAM 02/2008 dated 29.10.2008.

As mentioned in that circular, conformity test of the shipborne equipment shall be carried out by one of the authorized testing ASP. These tests shall be carried out in due time by companies in order to ensure compliance of their ships in a timely manner.

Six companies have been appointed as Authorized Testing ASP, namely:

Name of ASP:	Pole Star Space Applications Limited
Address:	Suite 301-303, Whiteleys Centre, Queensway, London W2 4YN UK.

24-hour telephone number	+33 561 3948 90
Fax:	+33 561 394797
Email:	EmsaLritSupport@cls.fr

With respect to the SOLAS V/19-1 Long-Range Identification and tracking regulation, the Authorized Testing ASP will undertake shipborne equipment testing and will subsequently issue a Conformance Test Report. By doing so, the shipborne equipment will be considered approved by our administration.

The tests shall comply with MSC.1/Circ.1257 (Guidance on the survey and certification of compliance of ships with the requirement to transmit LRIT information).

All charges related to these activities are to be addressed to the ship or its operating company.

It is reminded that ships will have to be integrated into the European LRIT Data Centre. This operation can only be done once the Conformance Test Report has been issued and all information requested in Annex 1 of circular CAM 02/2008 have been provided to the Commissariat aux affaires maritimes.
